

GetBeWarned Connect Pro establishes instant connection between the deaf/hard of hearing person and the service provider.

1

Display your unique QR code where it could be seen:

2

Deaf/hard of hearing customer **DOES NOT NEED** to have ConnectPro **PREINSTALLED OR TO DOWNLOAD** the app at the point of sale.

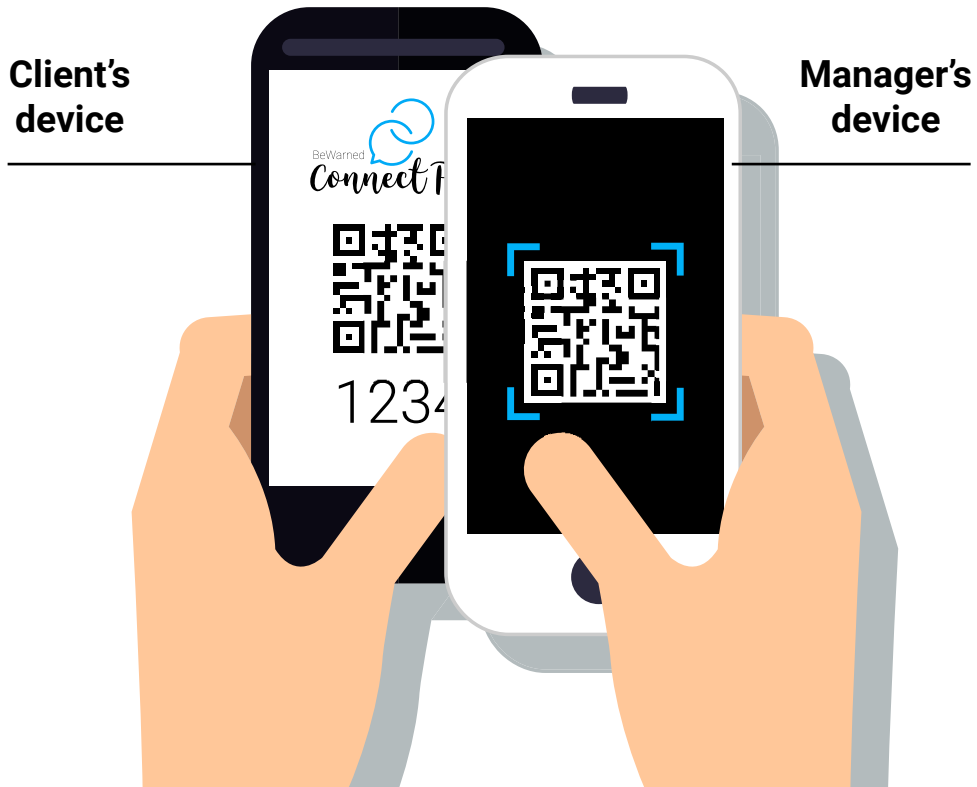

The only tool that is required is a QR code reader.

Deaf/hard of hear person scans the code

3

An employee counterscans the code and establishes an instant communication channel between the two devices.

4

Conversation starts:

Client's device

Manager's device

-OR-

Security Provisioning.

All logs are fully encrypted (end to end - RSA combined with AES).

As a separate feature - access to see the logs can still be granted within the management console if this feature is required.

On the customer side: all local conversations are logged on the active device while the browser is open. When the browser window is closed, all conversations are deleted forever from the local device.

On the employee side: all local conversations are logged and are available for review any time while the device still has the app installed or anybody else logs in and overrides the logs with a new session.

BeWarned Connect Pro establishes instant connection between the deaf/ hard of hearing person and the service provider.
